Twentieth Annual Convention of the International Christian Endeavor Society.

CINCINNATI FILLED WITH DELEGATES.

The Gathering Promises to Be the Largest in the History of the 50elety-Synopaia of President Clark's Annual Address and Secretary Haer's Report.

Cincinnati, July 6 .- The twentieth International Christian Endeavor convention began a five-days' session ln this city. The registration of delegates and visitors is unusually large, and the indications are that the attendance will be the largest in the hlstory of these great gatherings. In addition to the receptions and rallies at different state headquarters, the business session of the United Society of Christian Endeavor was held during the forenoon, at which the annual reports of the officers and business agents were submitted.

The annual session of the trustees

was held during the afternoon. The grand openings with welcome addresses and the annual address of President Clark and the annual report of Secretary Baer took place simultaneously in the Auditoriums at night. lowship societies that have disbanded for various reasons, or that have become exclusively denominational societies.

"The interdenominational fellowship, which has been from the first a blessed fruit of Christian Endesvor, has, during the past year, been fostered as never before. There was a time when it seemed that this unique feature of Christian Endeavor would be imperiled, but those days have gone, never to return, we believe. The denominational loyalty of local Christian Endeavorers is seldom challengod, but, on the contrary, we find it officially and heartily commended by many electeractical courts and assemblies in many denominations.

"One of the most gratifying facts to report is steady growth in 'foreign' and missionary lands. Secretary Chaplin, of the Brilish section, reported an increase of 500 societies, particular mention being made of the number of Episco-

tion being made of the number of Episco-pai Christian Endeavor societies that have been organized the past year in the Church of England. This, and other splendid achievements by our English trothers show conclusively that the great London convention was blessed of God. "Indeed, nothing shows the ndaptability of Christian Endeavor to every climate "Indeed, nothing shows the ndaptability of Christian Endeavor to every climate and country more than the fact that there are national Christian Endeavor unions in the United States, Canada, Eagland, Scotinnd, Ireinnd, Wales, Australia, Erance, Spain, Germany, South Africa, India, Chinn, Mexico and Japan, and that Christian Endeavor lealiets and coastitutions may now be found in Chinese, Japanese, Malagasy, Persian, Arabic, Turkish, Bulgarian, Armenian, Siamese, German, Freach, Italian, Greek, Spanish, Swedish, Dutch, Norwegian, Weish, Anstralian, Ilungarian, Coptic, Mexican, Portuguese, Indian, the many dialects of India and Africa.

Very naturally the increase in junior ory International the interesse in Junior and intermediate societies continues to be interesting. There are now over 16,000 junior societies and 1,285 intermediate societies, the first with 483,000 members, and the second with 38,500.

CUBAN ELECTORAL LAW.

Convention at Sea Because of Uncertainty

us to What Washington Will Do. HAVANA, July 7 .- The Cuban constitutional convention has not yet arrived at an understanding regarding the electoral law. The Conservatives are quite hopeless with respect to the reseinding of the universal suffrage clause, and they are now endeavoring to secure a plural vote for propertyholders, and for professional and business men. In tals they are strongly opposed by the Radicals.

An objection has recently been raised against drawing up the electoral iaw until the United States government has approved the constitution, the argument being that it would be usoless to draft laws based upon the constitution, if Washington is going to

make changes in this instrument.

American Captured With the Boers Will He Held Till the War Is Over.

Washington, July 7 .- Americans fighting in the Boer armles and made prisoners by the British will have to The Trial in the House of Lords endure their captivity until the eiose of the South African war.

Great Britain has declined to comply with the request of this government to release an American now confined on the Island of Ceylon, and this declination will probably prove a bar to further representations by the state department in behalf of Americans captured us beligerents in South Africa. The test case was that of a naturalized American named Morgan, who claims residence in Virginia.

Sir Alfred Milner, the British high commissioner in South Africa, disapproves of the release of foreigners who fought with the Boers. He has announced that a person who serves as a beliigerent with the Boer forces loses his uationality and must be treated as an enemy. This view is concurred in by the legal officers of the state department.

The department is satisfied, from luvestigation made by American consuls and the Brltish nuthorities, that all reports that the British are Ilitreating their prisoners are without foundation. The only hardship that Americans captured in South Africa will have to undergo will be that of confinement until hostillties cease.

In order to secure prompt settlement of cialms flied by American citizens for personal and property damages sustnined in South Africa, as a result of the actions of the British troops, the state department has officially requested aii claimants to submit memorlals setting forth the facts in connectlon with their claims, which will be transmitted through Ambassador Choate, to the British claims commission, now sitting in London.

The department is in receipt of complaints from numerous persons, claiming American nationality, which are the basis of clalms, but the records are not complete and in many cases the citizenship of the claimants is not established. The ciaims, which submit estimates of the damage suffered, amount to several hundred thousand that the British government may allow been established.

By Great Britism Will Not the Settled By One-Sided Arbitration.

WASHINGTON, July 7.—Consent to the arbitration of British claims against the United States will not be given by this government until Great Britain agrees to the urbitration of American pandora's box for the confusion of the claims pending against her.

This is the decision of the state department upon a request of Great Britain that certain claims nrising out of the expulsion of British subjects from Hawall during the royalist troubles in those Islands be referred to arbitration.

This government is not, of course, opposed to the principle of arbitration. Great Hrltain has, however, consistent ly declined to arbitrate claims presented by this government, including the Flji claims, which have greater merit than those which resulted from the conditions in Hawaii. American claims amount to several hundred thousand dollars, while those submitted by Great Britain have a much smailer aggregate.

The department is anxious to clear two governments, and If Great Britain will agee to arbitrate the American elaims the United States will undoubtedly be willing to ndopt this course with respect to British claims.

TERRIBLE HEAT IN TEXAS.

Fruit Heing Cooked on the Trees-Cattle on Ranges Seriously Menaced.

GMNESVILLE, Tex., July 7 .- This has been an awfui day for heat, the thermometer standing 107 in the shade and 132 In the sun.

The situation hero is very serious. The cotton crop is not only in jeopardy, but the apple and peach crops are cooking on the trees. They will amount to nothing.

The worst feature of all is that the little green bugs are appearing in many fields of eotton and have begun to do serious damage.

There is a water famine of the worst description, and the leading ranchmen say that If it does not rain in a few days they will loso heavily, as their cattle are suffering severely from

the excessive heat and dry weather. Hot as It is, however, there have been no prostrations or deaths reported.

CASE OF EARL RUSSELL.

May Present au Object Lesson to the People.

MAY TEND TO DIGNIFY THE JURY SYSTEM.

Course of Proceedure that line Lain in Abeyance for Nearly Sixty Years May Prove nn Eye-Opener to the Twentleth Century Brit-

New York, July 6 .- The London correspondent of the Tribune, writing of the Russel case, says:

The case of Earl Russell, Involving the trial of a peer by the house of lords after the suspension of functions of this kind for 60 years, may offer an object lesson in the form of a majority verdiet, which will tend to dignify the traditional rights and dignities of twelve ordinary men in the box. New precedents may be ereated by a fresh committee empowered to examine the journals of the house of lords.

The Essential Facts.

The essential facts will be that a radical peer will be exposed to a majority verdict from a house representing the old toryism of the priveleged classes, and that any member answering the roll call of the lord high steward will be both an ununswered juryman respecting issues of fact and a judge regarding complex questions of divorce law in England and in America. The results of so remarkable an experiment in criminai proceedure can not be safely forecast. An abandonment, or at least, a reconstruction of the antiquated procedure of trial by a privileged jury would seem more likely than the substitution of a majority for a unanimous verdict ln ordinary eriminal practice.

The Nevada Divorce.

The Nevada judge who granted the divorce decree to Eari Russell has, indeed been instrumental in raising a series of questions of exceptional indollars. The department does not see terest. This is the first issue of the how it will be possible to secure a validity of the divorce under the settlement of claims arising out of laws of Nevada and the decisions of damages following upon acts of the the United States supreme court. lloer government, as that government | There is a fundamental question of has ceased to exist. In the case of the power of any foreign tribunal to claims to mining rights, it is possible release an Englishman from the obligations of marriage contracted in his claimants the privilege of recourse to own country, and to enable him to rethe civil courts when they shall have turn to England with another wife. There is the issue of privilege, with the anomalous proceedure of trial by CLAIMS AGAINST "UNCLE SAM" the house of lords where there is a charge of felony against a peer, and this is the traditional inheritance of social conditions which have been transformed by the normal development of political justitutions.

A Pandarn's Hox Opened. The Nevada judge has opened a privileged order, and for the bewilderment of hair-splitting lawyers. The best consolation which the stern moralist can find is the bope that the Russell case may lead to the enactment of miform divorce laws in the states of the American union, and mny open the way for a closer approach between England and America in legislation for the defense of the sanctity of marriage.

The college bears the same relation to a university that a king bears to an emperor. An empire comprises kingdoms, and a university comprises colleges.

It is well known that George Wash-Ington advocated the establishment of a national university in the national capital; and his desire is gradually being developed. But the national university is yet only in embryo. It will not be perfected until the congress definitely acts upon the proposition which a number of good men have been projecting for more than a quarter of a century, out of their own individual means.

The secretary of agriculture says that the ideal national university would be a term of service in the executive departments for young men who have been graduated from secular or religious colleges and universities; a term of service in which they would learn all about the fedof the states.

The students of the world of science are indebted to those monks for the wonderful Ptolemaie theory of the unlverse, the details of which are marvelous and of great value. To those monks also historians are indebted for all of the knowledge which has been given concerulug the great past; and also for the information which has guided modern explorers to the excavations of ancient cities wherein human knowledge has been

almost miraculously developed. When he was a professor of exegetical theology, President Dwight, of Yale, said to the writer: "The college is truly democratic, no matter whether it be located in a reupblic, in a kingdom or an empire. The sons of rich men and of noblemen stand on a level with the sons of poor men. In college a young man is esteemed for what he is and for what he does; and the worthy poor man may stand far In advance of the unworthy rich."

Every man who has had experience ln educational matters realizes the forcefulness of that statement. In seeking the Utopia of true democracy one must look to the college or unlversity. This fact is particularly notable in the national capital, where hundreds of young men of all conditions in life are struggling together for that educational development which will fit them for all of the vicissltudes of the battle of life; the battle of which it has been said: "No tle It is only for God and the angels versity is slowly developing. universities all around the city upon

MILLIONS OF MOTHERS USE CUTICURA SOAP ASSISTED BY CUTI-CURA OINTMENT THE GREAT SKIN CURE

For preserving, purifying, and beautifying the skin of infants and children, for rashes, itchings, and chafings, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, and for all the purposes of the toilet, bath, and nursery. Millions of Women use Cuticura Soap in the form of baths for approximations influences and form of baths for annoying irritations, inflammations, and excoriations, for too free or offensive perspiration, in the form of washes for ulcerative weaknesses, and for many sanative, antiseptic purposes which readily suggest themselves to women, especially mothers. No amount of persuasion can induce those who have once used these great skin purifiers and beautifiers to use any others. Cuticura Soap combines delicate emollient properties derived from Cuticura, the great skin cure, with the purest of cleansing ingredients and the most refreshing of flower odors. It unites in ONE SOAP at ONE PRICE, the BEST skin and complexion soap and the BEST toilet, bath, and baby soap in the world.

COMPLETE EXTERNAL AND INTERNAL TREATMENT FOR EVERY HUMOR,

COMPLETE EXTERNAL AND INFERNAL TREATMENT FOR EVERY RUBOLS,

consin bulletin that exactly indicates the framework of my sile, except that my silo is 30 feet high and that the girts are closer than here ludicared. The corner pieces or segments are not properly indicated in the cut, to I have drawn another sketch that more clearly indicates them. In Fig. 2 you will see that I have the corner well rounded. From the inside of the corner (A) to the fnce of the segment (B) is 12 inches, and we have no trouble in going around this corner with ordinary tongued and grooved flooring. We fined this framework with yellow pine flooring and gave it a coat of hot eoal tar every year; one dollar's worth of tar and one dollar's worth of labor nre ample for this work. It is nir-tight and preserves the silnge perfectly, and I believe if the tarring is not neglected the lining will inst indefinitely. Some advocate n brick lining, but I do not think this practical, for the erevices would let in the air and the outside woodwork could not well be made airtight. While in wood-lined slla, toughed and grooved, the molsture of the sllage will at once swell it into an air-tight condition, and when the tarring is well done the drying out is redueed to the minlmum and the wood

protected against decay. The next plt I will build will be of the same construction, but larger. I believe It is practical to bulld them firm enough and strong enough against any bulging, up to 16 feet square. I do not think cement at all praetlea! in allo construction (except ns a foundation), for the least swelllug or contraction would erack and hreak the coating and let the air in .-M. C.
